

OUR PRODUCT CARBON FOOTPRINT CALCULATOR

In today's world, understanding and mitigating the environmental impact of products is more important than ever. At Avient, we are committed to supporting our customers in their sustainability journey. Our Product Carbon Footprint (PCF) Calculator is designed to provide precise insights into the carbon footprint of our solutions (from cradle to gate), enabling informed decisions for a more sustainable future.

QUANTIFYING AND REPORTING THE CARBON FOOTPRINT OF AVIENT SOLUTIONS

Our PCF Calculator evaluates the carbon footprint of our solutions to help provide an understanding of the environmental impact of end products. This tool is an integral part of our sustainability strategy, empowering our customers to make choices that align with their environmental goals.

CERTIFIED FOR ACCURACY AND RELIABILITY

Our PCF Calculator is third-party certified by [TÜV Rheinland](#) and aligns with the ISO

14067:2018 standard for quantifying and reporting the carbon footprint of a product. This certification ensures that our tool meets rigorous criteria and addresses relevant safety aspects, providing you with reliable and accurate data.

COMMITTED TO SUSTAINABILITY

Avient is dedicated to developing solutions that support sustainability and carbon emission reduction goals. By using our PCF Calculator, customers can baseline the carbon footprint of Avient solutions and identify which sustainable options offer a lower environmental impact.

Key Benefits of the PCF Calculator

- **Establish Baseline Carbon Footprint:** Measure a baseline carbon footprint for Avient solutions, enabling informed decisions about sustainability.
- **Understand Environmental Impact:** Gain insights into the environmental impact of end-use products, helping to enhance sustainability efforts.
- **Highlight Personal Efforts:** Showcase specific commitment to reducing greenhouse gas emissions by using lower carbon footprint solutions.
- **Develop Sustainable Products:** Leverage Avient's solutions to create new products that offer reduced environmental impact.
